Emergency cover 24/7

We provide emergency cover 24 hours a day, 365 days a year

Outside our opening hours, telephone calls to Jessop Fertility are answered by voicemail. Messages may be left on this service and will be answered the next working day. The message will also give details of the emergency out-of-hours contact.

If you need urgent medical advice out-of-hours, a member of the nursing staff is always available via the unit's long range pager. Please contact the main switchboard at the Royal Hallamshire Hospital on **0114 271 1900** and ask for the member of staff on call for the Assisted Conception Unit.

A consultant is also available to give advice or review patients on request from the on-call nurse or from staff at the Jessop Wing.

Bringing hope to life

A guide to our services

Expert treatment
to help you conceive

Welcome

Jessop Fertility offers a unique and dedicated service to couples who are experiencing fertility problems.

Located in the Jessop Wing, Sheffield, Jessop Fertility is one of the UK's leading assisted conception centres.

Our service is led by highly experienced NHS consultants who are experts in the field of infertility and reproductive surgery to ensure that you receive an exceptional service with continuity of care.

We offer the very latest assisted conception techniques, and our laboratories are equipped with the most advanced technology available.

Jessop Fertility is part of Sheffield Teaching Hospitals NHS Foundation Trust and works within its clinical governance. We are licensed by the Human Fertilisation and Embryology Authority (HFEA).

A wide range of treatments and associated services

A specialist will work with you to select the most suitable treatment depending on the diagnosis and type of infertility discovered. Treatment is tailored to your individual needs.

We offer:

- IVF
- ICSI
- Time lapse analysis of embryos
- Surgical sperm recovery
- Blastocyst culture
- Embryo / Egg / Sperm freezing
- Ovulation Induction (OI)
- Stimulated Intrauterine Insemination (SIUI)
- Donor Insemination
- Egg / Sperm share
- Egg / sperm donation
- Embryo Donation

We provide an integrated specialist service allowing a seamless transition between the various aspects of our service. This allows us to offer timely and efficient treatment.

NHS funding

NHS treatment is available for some couples, but the amount of funding available and the eligibility criteria for treatment varies.

Self-funding costs

A current price list is available on our website www.jessopfertility.org.uk

Expert treatment

Specialist counselling

Fertility treatment can impose emotional strain and may raise difficult choices.

Counselling offers you an opportunity to share and explore difficult feelings with someone who is not personally involved, but who understands your situation.

Our counselling service is free of charge and provides support, guidance and reassurance regarding any non-medical problems relating to your treatment.

Specialist Nursing

We have a team of experienced nurses, trained to a very high standard.

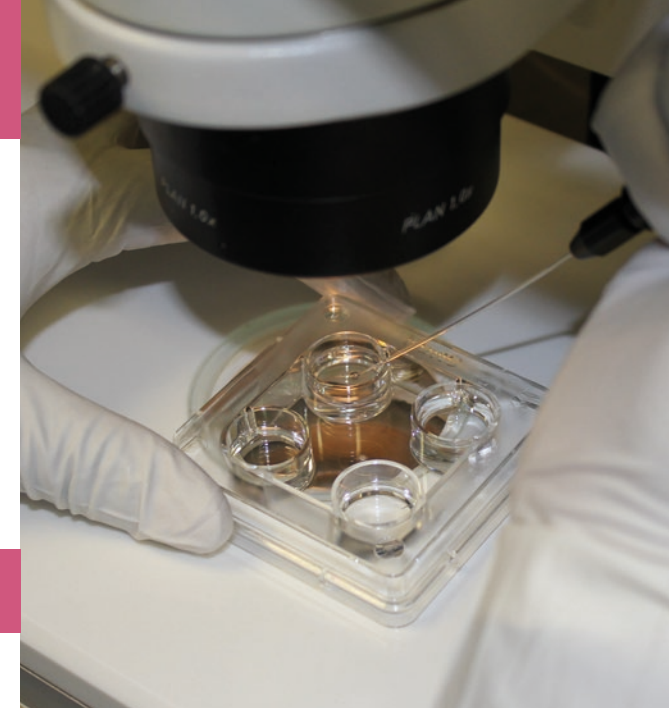

Our nurses are here to help and guide you through your treatment pathway, providing expert advice and support from the beginning of your journey to the end to ensure you receive the best care.

Advanced laboratories

In our laboratories we use state-of-the-art equipment, including the latest time-lapse technology, to monitor your embryos.

At Jessop Fertility we are committed to ensuring you have the best chance of a healthy baby, so we use single embryo transfer where appropriate. IVF Witness, a radio frequency tagging system is also used to ensure your eggs, sperm and embryos are safe whilst in our care.

We will aim to culture your embryos to the blastocyst stage (5-6 days old) to help us select the healthiest embryo for your transfer.

Research

Improving our care through research.

We are committed to improving patient care through research and innovation. Jessop Fertility is part of Sheffield Teaching Hospitals NHS Foundation Trust, which is one of the largest and busiest teaching hospitals in the country, recognised internationally for its specialist services and research.

The Trust has been voted one of the UK's top 10 performing NHS Trusts for clinical research by the National Institute for Health Research.

Research into infertility, embryo development and implantation are crucial to our continuing work for patients in the IVF clinic.

Research projects that we are involved in will be displayed on our website and in the clinic. You are very welcome to participate, but this is entirely voluntary. Clinic staff will be able to provide you with further information so that you can make an informed decision.
